

## THE WINNIE PROTOCOL - MISSING ADULT INFORMATION FORM

### What is the Winnie Protocol?

The Winnie Protocol is a scheme created by Northumbria Police and the Northumberland, Tyne and Wear Safeguarding Adult Boards to encourage carers and professionals to record useful information which could be used in the event of an adult going missing. This will support Northumbria Police and partners to locate and support the individual in the event of a future missing episode and reduce the risk of harm. The Winnie Protocol will be particularly useful for those adults who have repeat missing episodes.

The Winnie Protocol follows the same principles of the national Herbert Protocol scheme, which was established to protect people with dementia or Alzheimers who go missing. The Herbert Protocol is still to be used for those individuals.

## What is the purpose of this form?

The purpose of this form is to record important information about the person you support. In the event the person goes missing – the form will be used by the police, care workers and partner agencies to understand the person's routines, interests and information as fast as possible. The form should only be completed with the consent of the adult, and ideally should be completed with the adult.

- Complete the blue sections prior to possible missing episode
- Complete the red sections when person goes missing

#### What should I do with the form?

The form should be kept electronically in a safe place. The form must contain up to date information and be reviewed on a regular basis. Try and have several copies of recent, close-up photographs of the person, this may help your staff and the Police when searching for them. This form should only ever be printed on the request of a representative of Northumbria Police following the adult being reported missing. This information should be held securely and only used by the police to assist with enquiries into locating the Missing Person safely.

## What should I do if the adult goes missing?

- 1. Carry out information gathering and complete red section of the Winnie Protocol form
- 2. Inform family and friends and contact places that the person might frequent
- 3. Contact 101 (999 in an emergency). Inform the call taker that you have a copy of the WINNIE PROTOCOL and give the police the form

Part I - (to be completed when it has been identified the person is at risk of going missing)
